Summary

AI enthusiast with a strong passion for **data analytics and data engineering**, skilled in building **data-driven solutions** and leveraging **AI technologies** to extract insights and optimize performance. Experienced in **data processing, pipeline development, and analytical modeling**, with a focus on transforming raw data into actionable intelligence.

Technical Skills

Soft Skills: Problem Solving, Written Communication, Time Management, Critical Thinking, Collaboration, Curiosity, Willingness to Learn Fast

Hard Skills: Artificial Intelligence, Machine Learning, Data Structures and Algorithms, Data Visualization, Software Development, App Development, ETL, ELT, Data Pipelines, FastAPI, Large Language Models (LLMs)

Programming Languages: Python, C#, C, SQL, Java, KDB+/Q

Libraries & Tools: Tableau, Power BI, NumPy, Pandas, Scikit-learn, Visual Studio, Git, Jupyter Notebook, TensorFlow, PyTorch, Keras, Android Studio, Flask, MongoDB, MySQL Server

Cloud: Google Cloud Platform (GCP – BigQuery, Cloud Storage, IAM – fundamentals)

Experience

AI/ML Engineer Intern

Codezela Technologies

May 2026 – Present

Colombo

- Supporting for the **AI/ML lifecycle**, from data preprocessing and model building to performance analysis.
- Executing technical research, experiment tracking, and documentation for **system-level development**.
- Integrating **AI features** into production via collaboration with full-stack teams on APIs and backend services.
- Engaged in **bi-weekly performance reviews** to maintain technical excellence and professional growth.

Data Analyst Intern

Deloitte

September 2024 – August 2025

Colombo

- Utilized **ACL (Audit Command Language)** and ACL Scripting for data analysis and auditing tasks.
- Worked with **Excel** for data manipulation and **visualization**.
- Performed **data cleaning** to ensure accuracy and consistency in data sets.
- Assisted in **automating processes** and improving data workflows.

Projects

End-to-End Retail Customer Behavior Analytics

Data Analytics Project

Nov 2025 – Feb 2026

Python, SQL, Power BI, PostgreSQL, Pandas

- Developed a comprehensive data analytics pipeline to analyze retail customer shopping patterns and demographics.
- Performed data cleaning and advanced imputation in **Python**, replacing missing values based on category-specific medians.
- Engineered features including age_group segmentation and numerical purchase frequency mappings to enhance analytical depth.
- Migrated datasets to **PostgreSQL** and executed complex queries using **CTEs** and **Window Functions** for deep business insight extraction.
- Designed an interactive **Power BI dashboard** featuring dynamic slicers and KPIs to visualize revenue and sales trends.

Defending Deep Models with Distillation

Deep Learning Project

Nov 2024 – Jun 2025

Python, TensorFlow, Keras, MongoDB, Defensive Distillation

- Developed an interactive **Flask web app** for simulating **adversarial attacks** on neural networks.
- Built both baseline and distilled models using **TensorFlow/Keras** with GTSRB dataset.
- Integrated **FGSM and PGD attacks** to evaluate robustness of AI models.
- Stored and served data/results dynamically with **MongoDB**.
- Focused on end-to-end architecture, security, and visualization of results.

Hand Gesture Recognition

Deep Learning Project

- Developed a real-time hand gesture classifier using **CNNs** and webcam input.
- Performed image preprocessing, feature extraction, and classification.
- Used **OpenCV** for gesture capture and region-of-interest tracking.
- Designed a **CNN** with layers including Conv2D, MaxPooling2D, Flatten, and Dense.
- Tools: Image Data Generator, Video Capture

Jun 2024 – Aug 2024
Python, TensorFlow, OpenCV, Keras

Database Help Desk System

Database Handling Project

- Developed a system to deliver targeted resolutions for customer and employee issues.
- Implemented using C# language and connected the database using **MySQL Server**.
- Consists of 5 forms and designed GUIs for each form.

Feb 2024 – May 2024
C#, MySQL, GUI

Restaurant Management System

Python Project

- Developed a restaurant management system for managing orders, inventory, reservations and customer feedback.
- Implemented using **Python Language** with **OOP Concepts** and **Data Structures and Algorithms**.
- Conducted thorough testing and debugging to identify and resolve issues.

Dec 2023 – Feb 2024
Python, DSA, OOP

Education

University of Wolverhampton – CINEC Campus

BSc (Hons) Computer Science (Software Engineering) – First Class

Colombo
Aug 2024 – Jun 2025

University of West London – ANC Education

HND in Information Technology

Kandy
Sep 2022 – Feb 2024

Certifications

- Introduction to AI and Machine Learning – Google Cloud Platform
- Introduction to Data Engineering – Google Cloud Platform
- AI Fundamentals and Machine Learning – Microsoft Azure
- Python Basics – University of Moratuwa
- KDB+/Q Developer Level 1 – KX Developer
- KDB+/Q Developer Level 2 – KX Developer
